

Living Green Designs

**Commercial + Residential
Landscape Design**

Landscape Design

Our services are tailored to each clients wants and desires. We have a professional understanding of how people use outdoor spaces and design with current trends to create a inspired landscape that is uniquely yours. Our landscape designs range in scale from large, multifunctional sites to small, intimate spaces.

Landscape Construction

Our Green Construction Practices are environmentally responsible and resource-efficient for the life of the product. Green construction accounts for a products life-cycle: sourcing, installation, use, maintenance, renovation, and deconstruction. At Living Green Designs we are ushering in a new standard for construction that is as friendly for the environment as it is on your budget.

Landscape Maintenance

Our solar powered Landscape maintenance is designed for the environmentally conscious home or businesses who desire an optimal healthy environment. Our solar powered landscaping practices are sustainable, beneficial for the environment, and promote your well being as well. Our Solar powered landscaping improves air quality, increased soil quality and noise reduction.
